

WHERE HUMANS WORK, ERRORS OCCUR

How can we, as an industry, limit the occurrence and risk of human errors in the operational environment?

MAYDAY offers an interactive, immersive, and innovative approach to Human Factors training in which the crew gains a better understanding of how their mindset, behaviour, and attitude may affect others and the daily operations.

Essentially, **MAYDAY** is an active training tool that requires a facilitator to guide the participants through a scenario. This scenario simulates the real world - with all the Human Factors issues, dilemmas, and decisions the crew encounters daily. Factors which has a substantial impact on real life operations. **MAYDAY** trains the crew on the ship and in the helicopter to address and deal with these factors. Safely and efficiently.

MAYDAY NAVY TRAINING TOOL

For Different Operations
on Navy Vessels

We are looking for partners who want to collaborate with us to develop a relevant training scenario for defence and military personnel.

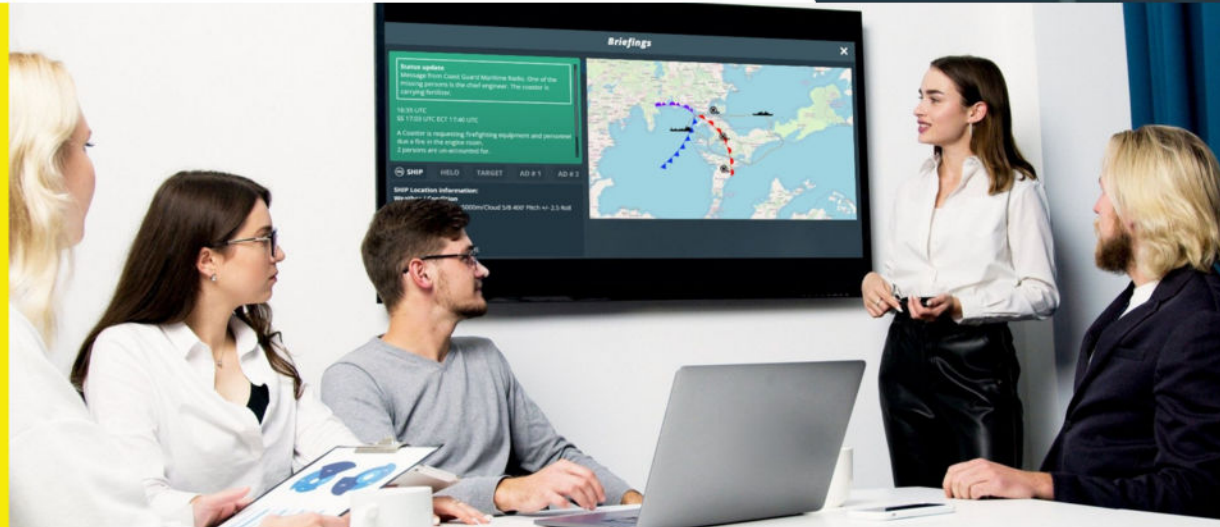

Is that you?

THE KEY TO ACTIVE LEARNING

MAYDAY Navy Training is a digital, interactive classroom training tool which offers simple simulations of the complex situations that play out in the operational environment. **MAYDAY** employs a scenario-based training approach to promote safer and more efficient operations.

HOW CAN WE TRAIN EFFECTIVE **OPERATIONAL RISK MANAGEMENT**?

WE INCORPORATE **SCENARIO-BASED LEARNING** INTO THE CLASSROOM TRAINING ENVIRONMENT.

MAYDAY facilitates a competency-based approach to training and assessment which enhances the non-technical skills of the crew, including their ability to:

- Work together & communicate as a team
- Make decisions under pressure, but in a realistic & risk-free learning environment
- Exert leadership & improve situational awareness
- Manage threat & error by always considering **CREW SAFETY, MISSION SUCCESS & COMPLIANCE**

BENEFITS OF MAYDAY

1. Low cost per user
2. Minimal instructor preparation
3. Valuable inputs for SMS, CBTA & EBT
4. Safety surveys for continuous improvement
5. High learning retention & competence building
6. Engaging, immersive & FUN training
7. EMAR compliant
8. Utilises technical skills to train NOTECHS
