## Our History

Resource Group is a privately owned business with origins tracing back to 1976. We have been serving the recruitment and training needs of the aviation and aerospace sectors for more than 40 years.

Resource Group's training division is a leading Part-147 approved training organisation, with a simulated Part 145 maintenance environment at our Cotswold and Humberside Airport facilities.

We have over 20 years of experience delivering approved European Aviation Safety Agency (EASA) and United Kingdom Civil Aviation Authority (UK CAA) training. We deploy a range of managed services worldwide including turnkey solutions such as the development and delivery of fully capable training academies. Our industry approvals are underpinned with accreditations from educational awarding bodies such as City & Guilds and OFSTED.

Resource Group holds UK CAA and EASA basic training approvals for fixed wing and rotary wing licence categories A1, A3, B1.1, B1.3 and B2.

We provide a wide range of services including Part-66 instructor-led and self-study modules with approved examinations, eLearning courses for maintenance personnel, pilots and cabin crew, practical and classroom-based courses, as well as consultative and training development services.

### Our Clients

Our clients include international airlines, offshore oil, gas and SAR helicopter operators, military and civil aircraft manufacturers and maintainers, defence sector suppliers, VIP operators, charter airlines and air taxi operators.

# Our Accreditations

## We value our processes and aim to deliver:

- A consultative approach to manage your requirements.
- High standards across the training spectrum.
- Flexible training solutions.
- A first-class learning environment, facilities and instructors.

# Part 66 Modular Courses

As a UK CAA and EASA approved basic training organisation, we offer high-quality Part-66 training worldwide to individuals and businesses. Our customers have the flexibility to study Part-66 courses through self-study training, providing students with the industry recognised qualifications needed to maintain, certify, and release an aircraft into service.

A core component of our Part-66 training is the use of our market leading, fully digital training material, which learners can access through our online learning platform - iAcademy. Our material contains interactive features including end of module assessments, quizzes, animation and video, to support all individuals with knowledge retention, regardless of their preferred learning style.

We provide fully comprehensive study material for all of the modules and licences listed below:

**A1** - Modules 1-3, 5-11, 15 and 17

**A3** - Modules 1-3, 5-10, 12 and 15

**B1.1** - Modules 1-10, 11, 15 and 17

**B1.3** - Modules 1-10, 12 and 15

**B2** - Modules 1-10, 13 and 14

**B1-B2** Licence Extension - Modules 4, 5, 7, and 13

**B2-B1.1** Licence Extension - Modules 2, 6, 7, 11, 15 and 17

**B2-B1.3** Licence Extension - Modules 2, 6, 7, 12 and 15

## **Part-66 Self-Study Courses**

Our Part-66 Self-Study courses enable students to study towards their Part-66 licence in their own time, around work and personal commitments.

Our digital training material has been developed to effectively facilitate learning for self-study students who will not have access to a Technical Instructor. With input from industry experts and educational specialists to enhance students' learning, the new courseware includes 3D graphics, interactive scenarios and engaging video content, which will help students understand the course concepts more easily. It also includes end of module knowledge checks with detailed reports to help students identify their strengths and weaknesses, as well as timed mock assessments to simulate the Part-66 examination experience. If the courses are being funded by the student's employer, the employer can also be given access to the student's learner records so they can track their team's learning progress.

Our Self-Study courses can be purchased individually with three months of access, or alternatively, we offer licence category bundles where the student will get access to all the necessary modules for a particular licence category for 6, 12, 18 or 24 months. The courses are compatible with various devices and can be accessed via the student's online iAcademy account at any time.

## **Part-66 Self-Study Course Exams**

When the student feels ready to take their approved examination, they can book onto an open exam session at one of our facilities. Please note, the examination price is not included in the course fee.

We recommend students take approved examinations with Resource Group and our providers, as these examinations are aligned with our training materials.
